The invention defined in claims 1-43 is not disclosed by any of these documents.

The cited prior art differ from the clamed invention in that neither of the documents describe that during hand-over, the congestion control is changed to provide faster recovery rate for the allowable number of packets.

Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-43 is novel and is considered to involve an inventive step. The invention is industrially applicable.
